FORM DESIGN EXCELLENCE

Advanced engineering from Germany ensures all AEG-Electrolux appliances deliver outstanding performance, durability and efficiency. And with design developed in the early 20th Century by the renowned German 'Bauhaus' designer, Peter Behrens, the AEG-Electrolux design foundations and values were established. Considered to be the 'Father of Functional Form', Peter Behrens' influence still lives on today with 'Form' being a key element of AEG-Electrolux's success.

function cooking perfection

AluTec® is a distinctive pearl blast aluminium finish, which is the perfect compliment for all types of kitchen furniture. AluTec® surfaces have been specially treated to make them highly resistant to scratches, marks and corrosion. It is easy to keep clean with most common cleaning agents. Exceptional durability ensures that they retain their good looks within the busiest kitchen environments.

PERFEKT IN FORM UND FUNKTION

AEG Electrolux

AEG-Electrolux ovens have high performance design built in, receiving several design awards including the prestigious IF Design Award 2004.

With a range of Single, Double and Double Undercounter ovens in a variety of colours, AEG-Electrolux offers an array of truly unique technology from a Multifunction Oven with Fully Integrated Steam Functions to a Double Oven with electronic interactive display with digital cooking.

FORM AWARD WINNING DESIGN

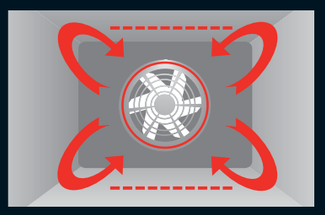
function rewarding results

Telescopic shelf runners enable baking trays and wire shelves to be pulled out fully for safe and easy access to the food.

Design Award Winner 2004

reddot design award winner 2004

Ventitherm® Precision is the ultimate in true fan cooking. It does not require pre-heating, which saves energy and its precise temperature control delivers even cooking throughout.



PERFEKT IN FORM UND FUNKTION

AEG Electrolux

Oven functions

OVEN FUNCTIONS This symbol represents the number of oven functions.

VIGOROUS STEAM The steam generator works with a fixed temperature at 96°C. Ideal for vegetables, rice, fish and reheating meals.

INTERVAL STEAM Alternates steam and hot air, 25% steam and 75% hot air. Ideal for roasting, baking and complete meal cooking.

INTERVAL PLUS Alternates between steam and air using 50% steam and 50% hot air. Ideal for foods with a high moisture content or for reheating convenience foods.

VENTITHERM® PRECISION The fan gently circulates hot air throughout the oven to give an even temperature. The ring element, top and bottom elements are electronically controlled to give the optimum temperature throughout the oven cavity, resulting in perfect cooking and energy efficiency.

Ventitherm® Precision's electronic controls also allow a greater range of cooking temperatures from 30°C to 300°C.

VENTITHERM® The fan gently circulates hot air throughout the oven to give an even temperature. Ventitherm® offers a range of benefits; does not require pre-heating, prevents transfer of flavours, keeps the oven cleaner and in turn, saves energy.

DUAL CIRCUIT VARIABLE GRILL Uses the inner and outer part of the grill element, to provide full width even grilling, ideal for 6 slices of toast.

VARIABLE ECONOMY GRILL Uses the inner part of the grill element, ideal for smaller portions such as 4 slices of toast. And by only using one element it saves energy.

FAST GRILL Heats up in less than 3 seconds. 20 x faster than a conventional grill, reduces grilling time by up to 50% with a 60% improvement in energy efficiency, compared to a standard grill element.

FAN CONTROLLED DEFROSTING Suitable for delicate items such as cream cakes, this light defrost circulates room temperature air around the food slowly, defrosting it in less than ½ the time.

ROTITHERM ROASTING The fan circulates hot air from the top element for the perfect authentic spit roast effect for meat, poultry and roasting potatoes, offering the benefits of rotisserie without the mess.

CONVENTIONAL COOKING Heat from the top and bottom elements provide traditional cooking for the professional cook. Ideal for baking bread and cakes.

PIZZA SETTING The fan circulates hot air from the top and bottom elements for a crisp pizza base yet perfectly melted cheese on top.

SPEEDCOOK Prevents the need to preheat the oven for all types of food - ideal for cooking convenience foods. These foods can be cooked in the exact cooking time that is specified on the packet.

HOT AIR FAN BAKING The fan circulates hot air, which is generated by the bottom element and ring element for perfect results when batch baking.

TEMPERATURE PROBE The electronic meat probe takes the guesswork out of cooking and provides perfect cooking results every time.

KEEP WARM Heat from the top and bottom elements are used to maintain a temperature of 80°C, ideal for keeping food warm until ready to serve.

BASE HEAT FINISHING Heat from the bottom element only, ideal for reheating pies and pastries, keeps the pastry crisp.

TOP HEAT BROWNING Heat from the top element only, ideal for browning lasagne or shepherd's pie.

SLOW COOK Uses low temperature to gently cook. Ideal for casseroles & joints.

Cleaning features

Pyroluxe® cleaning

PYROLYTIC AUTO CLEANING SYSTEM Cleans the oven by burning off the most stubborn cooking residues, leaving only ash to simply wipe away with a damp cloth when the oven has cooled. Once the Pyroluxe® setting is selected, the temperature rises to 500°C, locking the oven door at 300°C for safety. And with the quadruple glazed door reducing surface temperatures, the AEG-Electrolux Pyroluxe® oven door is safe to touch even at 500°C. Pyroluxe® keeps your oven hygienically clean without using chemicals and costs less than most household oven cleaners. Light Cleaning and Intensive Cleaning options are available on all Pyroluxe® ovens.

HEAT ACTIVATED CATALYTIC CLEANING A catalytic coating to the top and sides of the oven absorb the grease from cooking and with regular heating to 220°C the grease residue is burned away.

DIAMOND GLAZED ENAMEL INTERIOR A smooth enamel interior for ease of cleaning.

FULL GLASS INNER DOOR WITH REMOVABLE PANES All AEG-Electrolux single and double ovens have full glass inner doors. Single and double in-column ovens have removable panes for easy cleaning.*

FOLD DOWN GRILL Folds down to enable oven roof to be cleaned easily.

Oven features

OVEN FEATURES

DIGITAL TOUCH CONTROLS Easy to use highly responsive touch controls which give full precise control of all the oven's functions at the touch of a finger.

AVANTGARDE TECHNOLOGY The latest in digital oven technology; incorporating advanced features such as automatic meat probe programmes, automatic weight programmes, temperature proposal, programmable recipes, display and acoustic settings, memory functions, electronic temperature regulation and automatic recipes.

LCD FULLY ELECTRONIC DISPLAY Interactive Digital Cooking with LCD Display.

1. Scrolls through the oven functions indicating functions available to select.
2. Displays the recommended cooking temperature.
3. Indicates when the desired temperature is achieved.
4. Measures how long the oven has been on.
5. Removes the guess work from cooking and gives precise control for ease of use.

LED DIGITAL DISPLAY Menu Guided Temperature Control with LED Display.

1. Displays the recommended cooking temperature.
2. Indicates when the desired temperature is achieved.

24 HOUR ELECTRONIC CLOCK, MINUTE MINDER AND FULLY PROGRAMMABLE TIMER

1. Displays the time.
2. Counts down how long the food has been in the oven with an audible signal.
3. The oven can be programmed to switch on and begin cooking and then switch off after a set duration. Giving you full control over your cooking.

COUNT UP TIMER Lets you know how long the oven has been on.

RESIDUAL HEAT INDICATION Indicates the level of heat in the oven after it has been switched off.

CONTROLS A range of digital touch, digital push button, digital rotary, retractable rotary, standard rotary controls.

OVEN ILLUMINATION A selection of Halogen, 40W or 25W lighting is available in all AEG-Electrolux ovens, depending on individual model.

ALUTEC®

ALUTEC® This latest finish from AEG-Electrolux takes style and elegance of stainless steel one stage further. AluTec® is a distinctive pearl blast aluminium finish, which is the perfect compliment for all types of kitchen furniture.

CONVENIENT CLEANING AluTec® is easy to keep clean with most cleaning agents. Even abrasive cleaning detergents can safely be used without leaving marks on the surface.

SCRATCH RESISTANT AluTec® surfaces have been specifically treated to make them highly resistant to scratches, marks and corrosion. Exceptional durability ensures that they retain their good look in the busiest kitchen environment.

COOKING ACCESSORIES

MEAT PAN Full width deep meat pan suitable for roasting.

GRILL PAN AND HANDLE AEG-Electrolux Ovens come with a grill pan & handle*.

PIZZA STONE For cooking perfectly authentic stone baked pizzas.

BAKING SHELF Full width shallow shelf suitable for baking.

TELESCOPIC SHELF RUNNERS Additional accessory which enables baking shelves and wire shelves to be pulled out fully. They glide out effortlessly with a smooth rolling action.

SAFETY FEATURES

ISOFRONT® & ISOFRONT® PLUS Double/triple/quadruple glazed door. Multi-layered glass panes, with heat reflective coating, to keep the heat in the oven.

AUTO SAFETY SWITCH OFF The oven automatically switches off when it is left on for too long (time and temperature dependant).

CHILD LOCK Oven controls can be locked to prevent misuse.

ENERGY RATING All Electric Ovens must now declare their energy rating. All AEG-Electrolux ovens are either A or B rated. For Electric Double Ovens, both main and top oven are rated for their energy consumption.

*Excludes B81394 & B98204.

AEG Electrolux

Microwave functions

VENTITHERM® Fan cooking & Microwave

Combination microwave – Ventitherm® Fan cooking with Microwave, for golden brown food cooked in about half the time.

VENTITHERM® Fan cooking

Hot air is circulated around the oven using a ring element and the fan, giving all the benefits of Ventitherm® fan cooking.

GRILL & MICROWAVE Combination microwave - traditional grilling with microwave, in less time.

QUARTZ GRILL Faster heat up time than with a radiant grill and has a smooth surface for easy cleaning.

MICROWAVE Microwave energy creates friction with the moisture content of the food, which creates heat and cooks food quickly and conveniently.

MICROWAVE POWER LEVELS of 800W or 900W are available within the AEG-Electrolux range. Grill power may vary (if applicable).

AEG-ELECTROLUX MICROWAVE OVENS are available in 3 sizes to suit all households; NEW 40 litres, 26 litres and 17 litres.

RANGE OF MICROWAVE functions available from basic microwave functionality through to Combi Microwaves with Fan Ovens.

MICROWAVE FEATURES

12 or 24 HOUR CLOCK WITH AUTO TIMER Easy to set clock with a digital display and programmable timer.

ROTARY CONTROLS FOR LED DISPLAY Turn knob to select the power level, cooking time and also for selecting weight when using auto programmes.

CHILD LOCK On all AEG-Electrolux models for safety and peace of mind.

QUICK START CONTROL Starts on full power at the press of a button. Each operation gives 30 seconds of cooking. Can be pressed up to 5 times continuously for convenience.

AUDIBLE COOKING END SIGNAL Indicates when the food is ready.

BRIGHT OVEN LIGHT Easy to see inside.

AUTO COOK BY WEIGHT PROGRAMMES Fast programming for microwave and combined cooking where appropriate; select the food type and weight and the oven does the rest.

AUTO DEFROST PROGRAMMES Automatic defrosting programmes with microwave only, for fast defrost programming; just select the food type and weight and the oven does the rest.

MICROWAVE ACCESSORIES

For convenience, the interior of the combi microwave is furnished as a fan oven with shelf supports, oven/grill shelf and ceramic roasting tray.

Grill models include a low microwave rack and high grill rack.

INSTALLATION

All AEG-Electrolux Microwaves are now fully built-in therefore NO building-in kits are required.

The Combi Microwave has a triple glazed door and can be built-under the worktop or built in-column.

All other models should be built in-column and 60cm models can be built over an oven or refrigerator.

The 17 litre models are available in a choice of 50cm or 60cm wide versions for installation in a wall cupboard 30cm deep.

AEG
Electrolux

AEG-Electrolux offers Gas on Glass Hobs which are stylish and easy to clean. They are perfectly formed with cast iron stand supports. The advanced Touch Control Gas on Glass Hob combines complete safety and precision at your fingertips.
With bevelled edges and smooth touch controls giving a sleek finish, AEG-Electrolux's Ceramic and Induction Hobs will enhance the appearance of any kitchen.

Gas Hobs give instant heat, economy and controllability. In addition, AEG-Electrolux's special burner design produces a clean and perfect flame, giving total cooking flexibility and precise results. Induction Hobs offer fast and responsive cooking; the pan becomes hot yet the hob's smooth ceramic surface remains safe to touch. Energy is saved as only the exact amount needed for cooking is used, and cleaning is easy because nothing can bake on.

FORM DESIGN SIMPLICITY

Front-Line Future Hobs have minimalist styling and a unique, designer appearance. Entirely modular with co-ordinated design, the range offers the flexibility and functionality to suit any kitchen.

function responsive control

AEG-Electrolux's latest technology: The Teppan Yaki Stainless Steel Multi Purpose Cooking Surface. Perfect for meat, kebabs, sausages, bacon, fish or vegetables - without the restriction of pots and pans. Teppan Yaki is an ideal product for any kitchen.

PERFEKT IN FORM UND FUNKTION

AEG
Electrolux

Electric Hob Features

TOUCH CONTROLS WITH LED DISPLAY

Electronic touch controls ensure that all heat is precisely controlled.

POWER BOOSTER For intense rapid heat up.

HIGHLY INTELLIGENT CONTROLS WITH LED DISPLAY Stop+go, Timer per Zone, Child Safety Lock and Control Lock.

STOP+GO This is pressed to pause during cooking. It takes the selected zone down to a minimum. It is restored back to the original setting when pressed again. This can also be used as a handy keep warm setting.

TIMER PER ZONE Up to 99 minutes may be selected for each cooking area. The hob will automatically turn off and an acoustic signal will sound, ensuring cooking perfection every time.

CHILD SAFETY LOCK Two controls can be pressed together to lock the hob in the off position to prevent children from accidently turning the hob on.

CONTROL LOCK This is used when the hob is on to prevent any alteration or activation of the hob's setting and can also be used to lock the hob in the off position for extra safety.

AUTO SAFETY SWITCH OFF Hob will automatically switch off if left on for excessive time periods.

RESIDUAL HEAT INDICATORS This safety feature visually indicates when residual heat is left on the hob surface.

POT RECOGNITION INDICATORS The cooking zone will not operate when incorrect cookware is used or when no pan is on the hob and the controls are accidentally activated.

ELECTRIC HOB PERFORMANCE

INDUCTION ZONE Works by creating a magnetic field between the hob components and the steel core of the saucepan. Quicker than gas, more controllable, easy to clean and very safe, AEG-Electrolux Induction hobs are perfect in form and function.

HILIGHT ZONE Ceramic cooking areas with a fine ribbon element under the glass to heat up in less than 5 seconds.

DUAL ZONE A cooking area with 2 zones. The inner zone can be activated individually when using smaller pans.

TRIPLE ZONE A ceramic cooking area comprising of three different sizes, which can be activated to match the size of saucepan being used.

MULTI-PURPOSE ZONE An elongated oval zone, which can be used as a single zone with just the round section activated, or extended to accommodate casserole dishes or fish kettles.

RED-DOT ZONES Red dots on sealed plate hobs represent fast and more powerful cooking zones.

AUTOMAX Following selection of a power level and cooking time, pressing automax brings the zone up to maximum and then following a preset time returns to the selected power level for the remainder of the cooking time.

WIDTH OF HOB

NUMBER OF COOKING ZONES

Gas Hob Features

GAS ON GLASS Gas burners mounted on ceramic glass, stylish and easy to clean.

ENAMEL COATED PAN SUPPORTS Pan supports with an easy clean enamel coating. Pan supports are removable and dishwasher proof.

CAST IRON PAN SUPPORTS Professional appearance and a sturdy design. Cast Iron Pan supports can be removed and placed in a dishwasher for easy cleaning. Cast iron pan supports have non-slip silicon feet for even greater stability.

REMOVABLE WOK SUPPORT Removable cast iron wok support perfect for stir fry, can be placed in the dishwasher for easy cleaning.

LED DISPLAY An electronic display indicating the level of power that is in use.

SAFETY THERMOCOUPLES If the flame inadvertently goes out, the gas is shut off from the source, ensuring perfect safety.

AUTOMATIC INTEGRATED IGNITION All AEG-Electrolux gas hobs have integrated ignitions. The gas hob is lit automatically when the control knob is pushed and turned, in a single handed operation.

FRONT CONTROLS Burner controls are situated at the front of the hob for ease of reach, ideal for left or right handed cooks.

70cm HOBS All AEG-Electrolux 70cm Hobs can be fitted into a 60cm cut out and can be used with an AEG-Electrolux 60cm cooker hood.

LPG KIT A kit which converts the hob for use with LPG (bottled gas).

GAS HOB PERFORMANCE

BURNERS in different sizes - triple crown rapid, semi-rapid, simmer. AEG-Electrolux's special burner design produces a clean and perfect flame - for total cooking flexibility and precise results.

RAPID BURNER Large 3kW burner for more heat, ideal to heat larger pans.

SEMI-RAPID BURNER Medium 2kW burners idea for everyday food cooking.

SIMMER BURNER Smaller 1kW burners to ensure perfect simmering or best coverage on smaller pans.

TRIPLE CROWN BURNER Three individual circles of flame incorporated into one 4kW burner for maximum heat. Perfect for wok cooking.

WIDTH OF HOB

NUMBER OF BURNERS

NEW Touch Control Gas Hob

The pioneering new touch control gas hob combines the elegance and functionality of ceramic hobs with the controllability and precision of gas. Four separate digital displays control a clean and perfect flame with 6 power levels. Each burner is programmable up to 99 minutes finishing with a final acoustic 10 second countdown.

COMPLETE SAFETY To ensure maximum hob safety the touch control gas hob uniquely combines a control panel safety lock, residual heat indicators, auto safety switch off (after 4 hours).

AUTOMATIC RE-IGNITION Should the gas hob be accidently extinguished it will make 3 automatic attempts to re-ignite. After the 3rd attempt the gas supply to that burner will be automatically shut off.

LATEST TECHNOLOGY The very latest technology is used to ensure the quietest flame. It is even possible to programme the gas setting and undertake a diagnostic test using a serial port.

NEW Teppan Yaki

AEG-ELECTROLUX'S LATEST TECHNOLOGY: The Teppan Yaki Stainless Steel Multi-purpose Cooking Surface. Perfect for meat, kebabs, sausages, bacon, fish or vegetables - without the restriction of pots and pans. Teppan Yaki is an ideal product for any kitchen.

PRECISE HEAT CONTROL The electronic control guarantees the optimum temperature resulting in fast and precise cooking with a truly professional result. The Teppan Yaki has two separately controlled temperature zones to enable cooking of different foods and different temperatures at the same time.

PROFESSIONAL PRODUCT FOR A PROFESSIONAL RESULT The specially formed twin layer stainless steel surface provides rapid heat up and ensures a constant and even distribution of heat. The combination of the professional look and outstanding performance means that the Teppan Yaki would be as well suited for a professional chef's kitchen as it would your own home. Food can be prepared directly on the stainless steel surface with or without fat and oils, alternatively it is highly effective when using pots and pans.

AEG
Electrolux

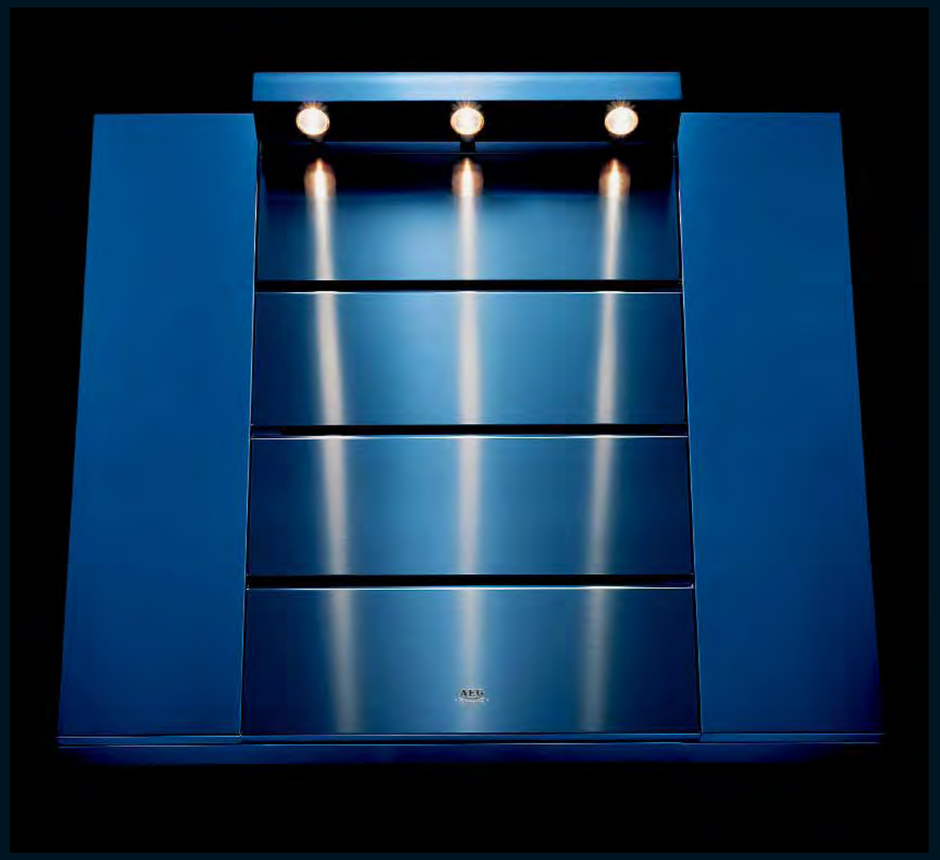
AEG-Electrolux's range of hoods complement any kitchen, regardless of size and style. From unique designer hoods to stylish chimney hoods and island hoods, each is designed to co-ordinate with your AEG-Electrolux oven and hob.

FORM PURE DESIGN STATEMENT



reddot design award
winner 2003

AEG-Electrolux's Cobra Hood design statement was 'reddot' design award winner 2003.

With a variety of sizes and the choice of extraction or recirculation mode, AEG-Electrolux has a range of hoods suitable for all kitchen and cooking needs.

function whisper-quiet operation

With whisper-quiet operation, as low as 59dB on some models, AEG-Electrolux's cooker hoods clear your kitchen of cooking vapours efficiently without making a noise about it.

Hood functions

Hood Width

The AEG-Electrolux Hood Range has a selection to suit all tastes, with a range of sizes to fit all requirements.

Extraction Rates

The level at which the cooker hood clears cooking vapours from the kitchen environment. AEG-Electrolux cooker hoods are measured in cubic metres per hour and are in accordance with IEC standards.

Low Noise Rating

A higher extraction without a loud noise, creating a more peaceful kitchen environment.

ELECTRONIC VARIABLE SPEED CONTROL Electronic precision to control the rate of extraction which can be varied to suit different types of cooking, providing optimum efficiency at minimal costs.

VARIABLE SPEED CONTROL The rate of extraction can be varied to suit different types of cooking, providing optimum efficiency at minimal cost.

SLIDER CONTROLS An easy to use slider control to operate speed levels and hood lights.

ELECTRONIC TOUCH CONTROLS Stylish, simple and precise settings.

PUSH BUTTON CONTROL For one-touch ease of use.

ELECTRONIC CONTROL BALL Controls the speed of the extraction, lights and indicates the saturation of the filters.

LED DISPLAY Indicates extraction speed and when the charcoal filter or metal grease filter needs changing or cleaning.

AUTOMATIC SENSOR CONTROL
A combination of 3 sensors are used to regulate the intensity of the extraction. These sensors are hob heat, ambient temperature and humidity.

ELECTRONIC TIMER/TIMED SETTING
Pre-set timers are incorporated into the hood so that it switches off at a programmed time.

REMOTE CONTROL Easy to use remote control for the hood.

HALOGEN LIGHTS This bright white illumination on the hood provides perfect cooking visibility and can be used to create softer light in the kitchen.

HOB LIGHTS This type of illumination on the hood provides excellent cooking visibility and can be used to create softer light in the kitchen.

EXTENDED VAPOUR GUIDE Pull out extension on integrated hoods for attachment of a furniture panel.

EXTRACTION MODE A ducting kit is attached to the hood to extract the cooking fumes externally, giving a pleasant kitchen environment, which is free from cooking odours.

RECIRCULATION MODE The hood draws in the cooking fumes, filters the air through the charcoal filter then recirculates the clean air back into the kitchen, leaving it free from cooking odours. For those hoods that do not come with a charcoal filter, it is available as an accessory.

FILTERS

METAL GREASE FILTERS The metal filter attracts the grease from the cooking vapours that are extracted, reducing odours, purifying the air and optimising performance. The filter is washable and never needs replacing.

ACRYLIC GREASE FILTER WITH SATURATION INDICATOR The filter absorbs grease from the cooking vapours that are extracted, producing cleaner air and reducing odours. Diagonal lines appear when the filter needs changing. This efficient and simple measure maintains perfect hood performance and extends the hood's life.

CHARCOAL FILTER This charcoal filter is used in recirculation mode to remove cooking smells. Needs replacing periodically.

LONGLIFE CHARCOAL FILTER This charcoal filter is used in recirculation mode to remove cooking smells.
It may be washed in the dishwasher and dried in the oven.

HOOD TYPES

DESIGNER HOOD For those whose initial requirement is design, with the reassurance that AEG-Electrolux Hoods are perfect in both Form and Function.

CHIMNEY HOOD An attractive feature in the kitchen, the chimney hood is fitted & fixed between furniture or for wall mounting.

CANOPY HOOD An attractive feature in the kitchen, the chimney hood is fitted & fixed into an island chimney, corner unit or wall cupboard.

TELESCOPIC HOOD Fitted & fixed into a 60cm wide furniture unit, with a shallow front cupboard. When in use it extends outwards beyond the cabinet and inwards for a flush finish when not in use.

ISLAND HOOD Suspended from the ceiling over a cooking station, the hood becomes the focal point of the kitchen. It can be used with an island unit.

INTEGRATED HOOD Fitted & fixed between wall units. Hidden by a furniture door, the hood is not visible, enhancing the appearance of the kitchen.

STANDARD HOOD Easy to install, it can be fitted underneath a 60cm wide wall cupboard. The controls are easy to reach at the front of the hood.

Unique design gives optimum use of cooking space and perfect extraction
